INTRODUCTION

- The Railway Reservation System is a Python project used to book train tickets and check seat availability.
- It helps passengers reserve seats easily and updates the available seats automatically after booking.
- The project uses Python concepts such as dictionaries, loops, and conditional statements.

Problem Statement & Objectives

Problem Statement:

- Manual ticket booking is time-consuming.
- Managing passenger and seat records is difficult.

Objectives:

- Display available trains.
- Book railway tickets.
- Manage seat availability.
- Handle invalid inputs.

PROCEDURE:

- **Store train details using a dictionary.**
- **Display menu options.**
- **Accept user choice.**
- **Check train number and seat availability.**
- **Book ticket and reduce seat count.**
- **Display booking status.**

PROGRAM:

Output:

If details are correct:

The screenshot shows the Programiz Python Online Compiler interface. The top bar includes the Programiz logo, 'Python Online Compiler' text, and a 'Programiz PRO' badge. Below the bar, there's a file name 'main.py', an 'Output' button, and icons for theme, share, and run. The output area displays the following text:

```
--- Railway Reservation System ---  
1. View Trains  
2. Book Ticket  
3. Exit  
Enter your choice: 2  
Enter Train Number: 101  
Enter Passenger Name: Eesha  
  
Ticket Booked Successfully!  
Passenger: Eesha  
Train: Express  
Remaining Seats: 4
```

If details are incorrect:

```
--- Railway Reservation System ---  
1. View Trains  
2. Book Ticket  
3. Exit  
Enter your choice: 5  
Invalid Choice!
```

```
--- Railway Reservation System ---  
1. View Trains  
2. Book Ticket  
3. Exit  
Enter your choice: |
```

CONCLUSION:

The Railway Reservation System helps users view trains and book tickets easily. It is a simple project that demonstrates the use of Python programming concepts in a real-world application.

The background is a light beige color. It features abstract organic shapes: a light tan shape in the top left and a light orange shape in the bottom right. A thin, dark green line curves across the top and bottom of the image.
